OUR CAPABILITIES

DESIGN

The result of a balanced collaboration and closer integration between the engineering, production, and installation team members is our design and engineering capability. We set a high bar for perfection for every procedure that supports it up front. Superior goods, cutting-edge technology, and tried-and-true production techniques enable clients' ideas on canvas to become reality.

MANUFACTURING

Our manufacturing facility, which spans over 100,000 square feet, is one of the biggest and most integrated in the sector. utilising highly skilled technicians and engineers who meticulously monitor the necessary output to ensure that it satisfies the highest standards of quality. Take it for granted that JMS will give your corporate IDs a fresh review and will guarantee on-time delivery

TURNKEY

By providing full turnkey services that include's consultation, design, production, installation, and maintenance, we enable each customer to focus on their area of expertise. The business consistently guarantees to provide comprehensive services for every single project that calls for Architectural signage, corporate identities, Light metal structures, Digital Displays, and Façade.

MAINTENANCE

JMS's deliverables don't end with the transfer of ownership. We accompany our customers on annual maintenance contracts and post-sale services, relieving them of the worry that all facilities will continue to function flawlessly. Our hardworking maintenance crew makes sure that every customer call is handled as quickly as possible.

CI ELEMENTS

Corporate Identity elements manufacturing requires high expertise. Even a minor change from the guidelines would take the brand for a toss. JMS possess all expertise to follow the guidelines to create international CI elements without compromising on quality.

SI ELEMENTS

JMS has an eye on detail on every showroom's modular furniture from Reception Desk to Sales Office Desk. Our clients enjoy wide range of various products produced and shipped to them in no time.

GLASS FAÇADE

Every showroom's elegance is enhanced by its façade. When it comes to glass façade, the team JMS has handful of experience to handle from C channel to spider fittings. We offer complete range of services from site measurement to installation.

ACP FAÇADE

Aluminium Composite Panel (ACP) is an economical alternative to aluminium sheet cladding. JMS can handle multistorey building façade with FR range of materials. Our superior material quality with a on time completion, we enhance the overall client experience.

OUR MISSION

To deliver high quality goods and services to customers that go above and beyond their expectations. Through our drive for quality and to offer top-notch customer service, establish lasting connections with our clients

OUR VISION

To stay on top, a sustainable environment friendly, premium service providing, and brand enhancement firm-worldwide

FAÇADE SIGN

These type of signs mostly made out of Aluminium or Stainless Steel. Our expert advise team can support to conclude the size, fixation and illumination of the façade sign.

PYLON

Pylon is widley used in outdoor sign as an information media. Using this, client can display prices, display offers, way finding and much more. These type of standalone sign structure needs sufficient concrete footing.

UNIPOLE

A huge advertisement display channel anchored on a single pole at an specified height is an Unipole. JMS engineering team can design the sufficient load bearing structure and execute at the right location and orientation.

WAY FINDING

Otherwise called as directional signs that gets installed indoor and outdoor to guide the visitors of the client facilities. There are several latest aesthetically best looking desings available that suits clients overall design concept.

ROOF TOP

The name sign of the business that gets placed above the roof with necessary support steel structure is called roof top signage. JMS can provide such designs with wind load and structural load calculation. With our distance view calculator, we can advise the client to decide the size of the sign for a better long distance view.

HOARDINGS

Hoardings are large outdoor displays with a printed flex banner that gets fastened with necessary steel structure. This can be of standalone or a façade of the building. A Hording act as an OOH.

FLAGS

Flags are used by the business houses to attract the visiting clients. Most of the flags with its pole carry client logo / venue name on it. The beauty of flags that waves in the air attracts each and every passer-by. JMS can supply variety of flag materials for long term or short term use.

DIGITAL DISPLAY

Now communicate with your target audience through advanced technology LED digital video screens. JMS provides a complete solution from consultation to execution on both your Indoor and outdoor needs. With our screens, you can manage your content from any part of the world. All our screens come with an automatic brightness sensor. We not only execute, we also maintain your

FURNITURE

Interior furniture elements plays a vital role in showroom aesthetics. To save the time, JMS provides modular type of showroom furnitures ranging from seating to product display shelves. With this the business can be commenced in shorter period of lead time.

An aerial photograph of a busy port at dusk or dawn. A large cargo ship is docked at a pier, with several yellow gantry cranes positioned along the dock. The ship's deck is covered with stacks of colorful shipping containers in shades of blue, red, green, and yellow. The water of the harbor is visible in the background, with a small boat on the water. The sky is filled with soft, colorful clouds from the setting or rising sun. The word "EXPORTS" is overlaid in the center of the image in a bold, orange, sans-serif font.
