

LEADERS IN
AUTOMOTIVE SHOWROOM
SOLUTIONS

About Us

Established in 2012, JMS Universal Technologies Pvt. Ltd. has emerged as a trusted leader in the design and manufacturing of Signage, Modular furniture and fixtures. Driven by a steadfast commitment to quality, precision, and innovation, we proudly align with the “Make in India” initiative, delivering customized, world-class solutions across a wide range of sectors—including automotive, retail, hospitality, and corporate environments.

Our state-of-the-art manufacturing facilities, combined with a highly skilled workforce, enable us to execute each project with excellence and efficiency. At JMS, we are dedicated to turning your vision into reality and look forward to a successful partnership

Our Vision

To be a sustainable, premium service provider recognized globally for delivering exceptional Signage, Façade, modular furniture and fixture solutions while upholding our commitment to environmental consciousness.

Our Mission

To deliver high-quality, bespoke furniture and fixture solutions that exceed client expectations. Our dedication to customer service and superior craftsmanship allows us to build enduring partnerships.

Our Core Values

Integrity: We uphold transparency and honesty in every project.

Quality: We adhere to rigorous quality standards to ensure precision and durability.

Innovation: We integrate cutting-edge technology and design to provide solutions that are both functional and aesthetically appealing.

Sustainability: Our commitment to eco-friendly practices reflects our responsibility toward a greener future.

Our Expertise

Engineering & Design

Comprehensive design solutions tailored to meet aesthetic, functional, and structural requirements.

Structural & Material Analysis

Ensuring compliance with safety, durability, and performance standards through rigorous testing and evaluation.

Project Collaboration

Working closely with architects, project managers, and contractors to ensure seamless project execution.

Engineering Drawings & Specifications

Preparation and review of detailed engineering drawings to ensure precision and efficiency.

On-Site Supervision & Installation

Expert oversight of the installation process, ensuring adherence to quality standards and project timelines.

Technical Problem-Solving

Identifying and resolving technical challenges to optimize structural integrity and visual appeal.
